BIDDING

PROPOSAL

TRANSPORTATION CABINET
Department of Highways
Frankfort, Kentucky 40622

PROPOSAL NO. _____
PROJECT CODE NO. 03-0016

LETTING OF JANUARY 17, 2003
Sealed Bids will be received in the
Division of Contract Procurement and/or
the Auditorium located on the 1st Floor
of the State Office Building until
10:00 A.M., EST, on JANUARY 17, 2003.
Bids will be publicly opened and read
at 10:00 A.M., EASTERN STANDARD TIME.

PROJECT IDENTIFICATION AND DESCRIPTION:

VARIOUS COUNTIES, FE04 121 DW03 0000005
Waterborne paint striping, with QC/QA, on various routes in Bullitt, Franklin, Henry,
Jefferson, Oldham, Shelby, Spencer, and Trimble Counties (District 5) for a distance of 1340
miles.

(5)

GRAPHIC COORDINATES:

LATITUDE - 37° 57' NORTH
LONGITUDE - 85° 40' WEST

COMPLETION DATE ESTABLISHED FOR PROJECT: _____ SEE SPECIAL NOTES

LIQUIDATED DAMAGES: _____ SEE STANDARD SPECIFICATIONS

REQUIRED BID PROPOSAL GUARANTY: Not less than 5% of the total bid.

(Check guaranty submitted: Cashier's Check ☐ Certified Check ☐ Bid Bond ☐)

BID BONDS WHEN SUBMITTED WILL BE RETAINED WITH THE PROPOSAL.

SPECIAL NOTES APPLICABLE TO PROJECT

THE FOLLOWING STANDARD DRAWINGS APPLY TO THIS PROJECT AND MAY BE OBTAINED BY CONTACTING THE DEPARTMENT OF HIGHWAYS, DIVISION OF DESIGN, AT A COST OF \$0.50 PER COPY:

Mobile Operation for Paint Striping Case I (TTS 100)
Mobile Operation for Paint Striping Case II (TTS 105)
Mobile Operation for Paint Striping Case III (TTS 110)
Mobile Operation for Paint Striping Case IV (TTS 115)

2000 SPECIFICATIONS

Any reference in the plans or in the proposal to the *Standard Specifications for Road and Bridge Construction, Edition of 1998*, and Standard Drawings, Edition of 2000 are superseded by *Standard Specifications for Road and Bridge Construction, Edition of 2000*, and Standard Drawings, Edition of 2003.

2001 SUPPLEMENTAL SPECIFICATIONS

The *2001 Supplemental Specifications* to the 2000 Standard Specifications for Road and Bridge Construction shall apply to this project.

PROPOSAL ADDENDA

All Addenda to this proposal must be incorporated into the proposal when the bid is submitted to the Kentucky Department of Highways. Failure to use the correct and most recent bid sheet(s) may result in the bid being rejected.

BID SUBMITTAL

Bidder must use the Department's Highway Bid Program available on the internet web site of Department of Highways, Division of Contract Procurement. (www.kytc.state.ky.us/contract)

The Bidder must download the bid items created from the web site to prepare a bid proposal for submission to the Department. The Bidder must insert the completed bid item sheets printed from the Program into the bidder's proposal and submit with the disk created by said program.

JOINT VENTURE BIDDING

Joint Venture bidding is permissible. However, both companies MUST purchase a bidding proposal. Either proposal may be submitted but must contain the company names and signatures of both parties where required. A joint bid bond of 5% may be submitted for both companies or each company may submit a separate bond of 5%.

UNDERGROUND FACILITY DAMAGE PROTECTION

The contractor is advised that the Underground Facility Damage Protection Act of 1994, became law January 1, 1995. It is the contractor's responsibility to determine the impact of the act regarding this project, and take all steps necessary to be in compliance with the provisions of the act.

ASPHALT BASE PRICE

The Asphalt Base Price shall be \$170.00 (English) as applicable in Section 109.07 of the *2000 Standard Specifications*.

NHS PROJECTS

This project is on the *NATIONAL HIGHWAY SYSTEM*.

WORK ZONE CATEGORY I AND II DEVICES

The Contractor is required to provide certification that all *Work Zone Category I and II Devices* are compliant with NCHRP 350 before these devices are used on the project. *Category II Devices* include, but are not limited to: portable sign stands (with signs), type I, II & III barricades, vertical panels, intrusion alarms, cones with lights, and other work zone devices under 45kg (100 lb).

**Supplemental Specifications to The Standard Specifications
for Road and Bridge Construction, 2000 Edition
(Effective with the October 25, 2002 Letting)**

Unless stated otherwise, all revisions are to the Standard Specifications for Road and Bridge Construction.

PUBLICATION:	2001 Supplemental Specifications to The Standard Specifications for Road and Bridge Construction.
SUBSECTION:	104.02.02 Overrun and Underrun Formulas.
REVISION:	Void the revision.
SUBSECTION:	104.02.02 Overrun and Underrun Formulas.
REVISION:	Replace the fifth paragraph with the following: For the excessive underrun and overrun quantities, the Department will adjust the payment according to the appropriate following formula:
SUBSECTION:	104.02.02 Overrun and Underrun Formulas.
NUMBER:	3)
REVISION:	Replace the threshold value of 20 percent with 30 percent.
SUBSECTION:	102.07.01 General.
REVISION:	Replace the first sentence with the following: Submit the Bid Proposal on the forms furnished by the Department including the Highway Bid Program bid item sheets and disk created from the Department's internet web site.
SUBSECTION:	102.07.02 Computer Bidding.
REVISION:	Replace the subsection with the following: Subsequent to ordering a Bid Proposal for a specific project, use the Department's Highway Bid Program on the internet web site of the Department of Highways, Division of Contract Procurement. Download the bid item quantities from the Department's web site to prepare a Bid Proposal for submission to the Department. Insert the completed bid item sheets printed from the Highway Bid Program into the Proposal and submit along with the disk created by said program. In case of a dispute, the Bid Proposal and bid item sheets created by the Highway Bid Program take precedence over any bid submittal. Furthermore the Department takes no responsibility for loss, damage of disks or the compatibility with the bidder's computer equipment or software.
SUBSECTION:	102.08 IRREGULAR BID PROPOSALS.
REVISION:	Add the following to the first set of items: 4) Fails to submit a disk created from the Highway Bid Program
SUBSECTION:	102.08 IRREGULAR BID PROPOSALS.
REVISION:	Replace 1) of the second set of items with the following: 1) when the Bid Proposal is on a form other than that furnished by the Department or printed from other than the Highway Bid Program, or when the form is altered or any part is detached.
SUBSECTION:	112.03.01 General Traffic Control.
PART:	I) Temporary Traffic Signals.
REVISION:	Replace the MUTCD reference "Section 4B" with "Chapter 4D"
SUBSECTION:	212.03.03 Permanent Seeding and Protection.
PART:	A) Seed Mixtures for Permanent Seeding.
REVISION:	Replace with the following: A) Seed Mixture for Permanent Seeding. Use seed Mixture No. I or as the Contract specifies. Mixture No. I: 75% Kentucky 31 Fescue (<i>Festuca arundinacea</i>) 10% Red Top (<i>Agrostis alba</i>) 5% White Dutch Clover (<i>Trifolium repens</i>) 10% Ryegrass, perennial (<i>Lolium perenne</i>)

**Supplemental Specifications to The Standard Specifications
for Road and Bridge Construction, 2000 Edition
(Effective with the October 25, 2002 Letting)**

SUBSECTION:	212.03.03 Permanent Seeding and Protection.
PART:	C) Crown Vetch.
REVISION:	Replace the first sentence with the following: Sow crown vetch seed on all areas having a slope 3:1 or steeper and consisting of soil or mixtures of broken rock and soil.
SUBSECTION:	212.03.03 Permanent Seeding and Protection.
PART:	E) Erosion Control Blanket.
REVISION:	Replace the first sentence with the following: Install erosion control blankets in ditches, except those to be paved or rock lined, to a flow depth of 1.5 feet.
SUBSECTION:	402.03.02 Acceptance.
PART:	C) Setup.
REVISION:	Add the following after the second sentence: For mixtures with a total-project quantity between 500 and 1,000 tons, perform a minimum of one process control test for AC, AV, and VMA, and report the results to the Engineer.
SUBSECTION:	402.03.03 Verification.
REVISION:	Replace the first two sentences with the following: For volumetric properties, the Department will perform a minimum of one verification test for AC, AV, and VMA for each lot according to the corresponding procedures as given in Subsection 402.03.02. For specialty mixtures, the Department will perform one AC and one gradation determination per lot according to the corresponding procedures as given in Subsection 402.03.02. However, Department personnel will not perform AC determinations according to KM 64-405.
SUBSECTION:	403.02.06 Transport Equipment.
REVISION:	Add the following after the first sentence: Do not load trucks that are contaminated with an unapproved release agent. When such contamination is identified after loading, reject the load. In either case, remove the truck and respective driver from the project for the duration of the project.
SUBSECTION:	403.03.03 Preparation of Mixture.
PART:	A) Mixture Composition.
REVISION:	Replace the second sentence with the following: Conform to the gradation requirements (control points) of AASHTO MP2 for the Superpave mixture type the Contract specifies.
SUBSECTION:	403.03.03 Preparation of Mixture.
PART:	C) Mix Design Criteria.
REVISION:	Replace the first sentence with the following: Conform to the gradation requirements (control points) of AASHTO MP2 for the Superpave mixture.
SUBSECTION:	403.03.03 Preparation of Mixture.
PART:	C) Mix Design Criteria.
NUMBER:	2) Selection of Optimum AC.
REVISION:	Add the following: Ensure the optimum AC is a minimum of 5.0 percent by weight of the total mixture for all 0.5-inch nominal surface mixtures and 5.3 percent by weight of the total mixture for all 0.38-inch nominal surface mixtures.
SECTION:	403.03.06 Thickness Tolerance.
TABLE:	Nominal Maximum Size of Mixture vs. Thickness Range
REVISION:	Delete

**Supplemental Specifications to The Standard Specifications
for Road and Bridge Construction, 2000 Edition
(Effective with the October 25, 2002 Letting)**

SUBSECTION:	403.03.09 Leveling and Wedging, and Scratch Course.																			
PART:	A) Leveling and Wedging.																			
REVISION:	Replace the first sentence with the following: Conform to the gradation requirements (control points) for base, binder, or surface as applicable.																			
SUBSECTION:	403.03.09 Leveling and Wedging, and Scratch Course.																			
PART:	B) Scratch Course.																			
REVISION:	Replace the second sentence with the following: Conform to the gradation requirements (control points) for base, binder, or surface as the Engineer directs.																			
SECTION:	404 OPEN-GRADED FRICTION COURSE																			
TABLE:	LOT PAY ADJUSTMENT SCHEDULE FOR SPECIALTY MIXTURES																			
REVISION:	Replace the table with the table on the last page of this supplement.																			
SUBSECTION:	409.02 MATERIALS AND EQUIPMENT.																			
REVISION:	Replace "KM 64-427" with the following: the guidelines in Subsection 409.03.02																			
SUBSECTION:	409.03.01 Restrictions.																			
REVISION:	Add the following sentence: When the mixture's bid item specifies PG 76-22, limit RAP content to 20 percent or less.																			
PUBLICATION:	2001 Supplemental Specifications to The Standard Specifications for Road and Bridge Construction.																			
SUBSECTION:	409.03.02 Preparation of Mixture.																			
PART:	A) Mix Requirements.																			
REVISION:	Void the Revision and replace with the following: Conform to the Contract requirements for each mixture produced using RAP. If mixtures produced using RAP do not conform to the requirements for that mixture, complete the project using all virgin materials at no additional expense to the Department. Conform to the following table to select the appropriate grade of virgin asphalt binder to blend with the RAP:																			
<table><tr><th rowspan="2">Mixture's Bid Item</th><th colspan="3">Appropriate Virgin Asphalt Binder</th></tr><tr><th>0-20% RAP</th><th>21-30% RAP</th><th>>30% RAP</th></tr><tr><td>PG 76-22</td><td>PG 76-22</td><td>-</td><td>-</td></tr><tr><td>PG 70-22</td><td>PG 70-22</td><td>PG 64-22</td><td>*</td></tr><tr><td>PG 64-22</td><td>PG 64-22</td><td>PG 64-22</td><td>*</td></tr></table> <p style="text-align: center;">* Select according to KM 64-427</p>		Mixture's Bid Item	Appropriate Virgin Asphalt Binder			0-20% RAP	21-30% RAP	>30% RAP	PG 76-22	PG 76-22	-	-	PG 70-22	PG 70-22	PG 64-22	*	PG 64-22	PG 64-22	PG 64-22	*
Mixture's Bid Item	Appropriate Virgin Asphalt Binder																			
	0-20% RAP	21-30% RAP	>30% RAP																	
PG 76-22	PG 76-22	-	-																	
PG 70-22	PG 70-22	PG 64-22	*																	
PG 64-22	PG 64-22	PG 64-22	*																	
SUBSECTION:	611.03.02 Precast Unit Construction.																			
REVISION:	Replace the first sentence with the following: Construct units according to ASTM C 1433 with the following exceptions and additions:																			
PUBLICATION:	2001 Supplemental Specifications to The Standard Specifications for Road and Bridge Construction.																			
SUBSECTION:	701.03.05 Joints.																			
PART:	B) Corrugated Metal Pipe.																			
REVISION:	Void the Revision and replace with the following: Construct joints using a band with annular corrugations and a bolt, bar and strap connection. Use a minimum nominal band width of 12 inches for all pipe diameters 54 inches and smaller. Use a two-piece band with a minimum nominal width of 20 inches for all pipe diameters greater than 54 inches. Manufacture the band from the same base materials as the pipe. The pipe bands may be up to two gauges lighter than the pipe it is joining, with a minimum gauge thickness of 16. The Department may allow dimple band connections for field cut pipe. Install the connecting bands according to the manufacturer's written recommendations.																			

**Supplemental Specifications to The Standard Specifications
for Road and Bridge Construction, 2000 Edition**
(Effective with the October 25, 2002 Letting)

SUBSECTION:	710.02 MATERIALS.
REVISION:	Add the following Subsection: 710.02.15 High Density Polyethylene (HDPE) Adjusting Rings. Conform to Section 846.
SUBSECTION:	710.03.01 Newly Constructed Small Drainage Structures.
PART:	A) General.
REVISION:	Replace the last sentence of the sixth paragraph with the following: Use precast concrete, precast concrete pipe sections, cast-in-place, brick, or HDPE adjusting rings for adjustment of existing manholes according to the Standard Specifications.
SUBSECTION:	710.03.03 Adjusted Small Drainage Structures.
REVISION:	Add the following sentence to the end of the first paragraph: For HDPE adjusting rings, install and seal according to the manufacturer's recommendations.
SUBSECTION:	713.03 CONSTRUCTION.
REVISION:	Replace the MUTCD references to "Part III" with "Part 3"
SUBSECTION:	714.03 CONSTRUCTION.
REVISION:	Replace the MUTCD references to "Part III" with "Part 3" and figure references to "3-11 and 3-12" with "3B-8 and 3B-9"
SUBSECTION:	714.03.01 Layout.
REVISION:	Replace the MUTCD reference to "Part III" with "Part 3"
PUBLICATION:	2001 Supplemental Specifications to The Standard Specifications for Road and Bridge Construction.
SUBSECTION:	714.05 PAYMENT.
REVISION:	Replace with the following: The Department will make payment upon completion of the work. If after the proving period the markings do not meet minimum retroreflectivity requirements, the Department will adjust the payment or require corrective work according to the following:
SUBSECTION:	718.01 DESCRIPTION.
REVISION:	Replace the second sentence with the following: See Section 3C.01 of the MUTCD for a general description.
SUBSECTION:	807.02.03 Joint Sealer for Ridged Pipe.
PART:	B) Rubber Gaskets.
REVISION:	Replace with the following: B) Butyl Rubber Sealants. Furnish butyl rubber sealants conforming to the materials, manufacture, and physical requirements for sealants in AASHTO M 198, Section 6.2. Use only products from the Department's List of Approved Materials.
SUBSECTION:	807.02.03 Joint Sealer for Ridged Pipe.
PART:	C) Flexible Plastic Gaskets.
REVISION:	Replace with the following: C) Rubber Gaskets. Furnish rubber gaskets conforming to the materials, manufacture, and physical requirements for gaskets in AASHTO M 315. Use only products from the Department's List of Approved Materials.

**Supplemental Specifications to The Standard Specifications
for Road and Bridge Construction, 2000 Edition
(Effective with the October 25, 2002 Letting)**

SECTION: 846 HIGH DENSITY POLYETHYLENE (HDPE) ADJUSTING RINGS
REVISION: Add the following New Section:

SECTION 846 HIGH DENSITY POLYETHYLENE (HDPE) ADJUSTING RINGS

846.01 RESIN. Use a recycled polyethylene plastic or virgin resin producing a molded part meeting the following requirements:

Melt Flow Index (ASTM D 1238)	4.0-10.0 g/10min
Density (ASTM D 792)	0.941-0.965 g/cm ³
Tensile (ASTM D 638)	2000-5000 lb/in ²
ESCR (ASTM D 1693)	Condition C

846.02 LOADING. Ensure the adjustment rings meet or exceed the loading requirements of AASHTO'S Standard Specification for HS-25 wheel loading for Highway Bridges.

SECTION: 827.04 PERMANENT SEED.
REVISION: Replace with the following:

827.04 PERMANENT SEED. Conform to the requirements outlined in the "Kentucky Seed Law and Provisions for Seed Certification in Kentucky" and the "Regulations under the Kentucky Seed Law", with following exceptions:

1. Obtain seed only through registered dealers that are permitted for labeling of seed.
2. Ensure all deliveries/shipments of premixed seed are accompanied with a master blend sheet.
3. The Department may sample the seed at the job site at any time.
4. Ensure all bags and containers have an acceptable seed tag attached.

Do not use seed (grasses, native grasses and legumes) if the weed seed is over 2%, total germination (including hard seed) is less than 60%, if the seed test date is over 9 months old exclusive of the month tested, or if the limits of noxious weed seed is exceeded.

Ensure that noxious weed seeds contained in any seed or seed mixture does not exceed the maximum permitted rate of occurrence per pound.

<u>Name of Kind</u>	<u>(per pound)*</u>	Max. No. Seeds
Balloon Vine (Cardiospermum Halicacabum)	0	
Purple Moonflower (Ipomoea turbinata)	0	
Canada Thistle (Cirsium Arvense)	0	
Johnsongrass (Sorghum Halepense and Sorghum Alnum and perennial rhizomatous derivatives of these species)	0	
Quackgrass (Elytrigia Repens)	0	
Annual Bluegrass (Poa Annua)	256	
Buckhorn Plantain (Plantago lanceolata)	304	
Corncockle (Agrostemma Githago)	192	
Dodder (Cuscuta spp.)	192	
Giant Foxtail (Setaria Faberii)	192	
Oxeye Daisy (Chrysanthemum Ieucanthemum)	256	
Sorrel (Rumex Acetosella)	256	
Wild Onion and Wild Garlic (Allium spp.)	96	

* Seed or seed mixtures that contain in excess of 480 total noxious seeds per pound is prohibited

Wildflower seed shall not be planted until approved by the MCL.

**SPECIAL NOTES
FOR**

FE04 121 DW03 0000005

**WATERBORNE PAINT STRIPING SPECIFICATIONS for FY 2003
DISTRICT 5 (LOUISVILLE)
FE04 121 DW03 000005**

GENERAL PROVISIONS

Work performed under this contract shall be in conformance with Commonwealth of Kentucky, Transportation Cabinet, Department of Highways' Standard Specifications for Road and Bridge Construction, 2000 Edition, applicable Special Provisions and general specifications included in this proposal. The U.S. Department of Transportation's Manual on Uniform Traffic Control Devices (MUTCD), Current Edition, with all published changes and additions shall also apply to this contract.

NOTE: The low bidder will be required to provide a detailed description of the proposed datalogging equipment to be used to meet requirements listed elsewhere in the contract as well as an example of the datalogger report. This information must be submitted within 10 days of the bid letting to the Division of Traffic Central Office. The datalogger must be approved by the Division of Traffic Central Office prior to award.

SCOPE OF WORK

The work performed under this contract shall consist of furnishing and applying waterborne paint, reflectorized with glass beads, to the sections of roadway to be provided at the pre-construction meeting. This contract is for the installation of centerlines, lane lines, edgelines, and gore markings only. Special markings such as stop bars, crosswalks, cross-hatching, railroad markings, etc. are not to be installed under this contract.

Intersection approach markings such as the edgelines of large painted islands or edgelines on mountable medians may be included at the discretion of the Engineer provided they can be painted by the striping truck. Markings that would require application by equipment other than the striping truck are not to be installed under this contract.

The vast majority of the work performed under this contract will consist of retracing existing lines. The Department will be responsible for pre-marking any section of roadway where the old markings are no longer visible or where the existing markings are to be changed. Edgelines shall not be installed on any section of roadway where edgelines do not currently exist without authorization from the Engineer.

QUALITY CONTROL/QUALITY ASSURANCE

The Contractor is responsible for Quality Control (QC) and will establish and maintain an effective quality control plan.

The Contractor shall designate a Quality Control Coordinator for the project who will be the contact person for any questions or concerns regarding the quality of the work performed under this contract. The Quality Control Coordinator shall:

- Hold current qualification from the Department as a Pavement Marking Inspection Technician;
- Plan and oversee the Contractor's evaluation of the lines applied on the project;
- Perform KM-202, for all striping applied and provide completed test reports to the Engineer;
- Adjust the application process to consistently produce the quality of line desired;
- Notify the Engineer of any changes in the striping work plan that are determined necessary;
- Inform and mobilize crews to complete restriping or corrective work (after notification by the Department);
- Supply the appropriate certifications for paint and beads to the Engineer assigned to the particular project ;
- Track the quantities of materials supplied by the vendors and applied by the painting crew; and
- Meet with the Engineer to discuss and/or conduct field reviews on the project throughout the execution of the contract.

At the Pre-construction Conference, the Contractor shall furnish the Department a quality control plan that covers in detail the following items:

- the name, address, phone and fax numbers for the Quality Control Coordinator;
- the names of individuals other than the Quality Control Coordinator taking readings in accordance with KM202 (these people shall hold qualification from the Department as Pavement Marking Inspection Technicians)
- an overall work plan which states the estimated starting and completion dates for the entire project, the number of crews to be used on the project and a general description of how the project will be completed;
- a description of the striping equipment to be used on the project, including make and model of each striper, minimum and maximum operating speeds, and type of instruments to be used to calibrate the flow of paint and beads;
- the frequency and method to be used to monitor application rates and quality of the line (specifically with regard to retroreflectivity, width, thickness, bead distribution, tracing accuracy, etc.);
- a list of paint(s) and bead(s) to be used in this contract along with a statement from the paint manufacturer that indicates the application temperature of the paint, the recommended ambient and road temperatures, and guidelines for any other environmental factors that would adversely affect the successful performance of the paint; and
- the contact person, phone and fax numbers for reporting claims for paint on vehicles.

Acceptance of the Contractor's quality control plan is required prior to the start of work.

The Department reserves the right to require the Contractor to make changes in his quality control plan and operations to obtain the quality specified in the contract.

After acceptance by the Department, the Contractor shall notify the Engineer in writing of any proposed change. Proposed changes are subject to acceptance by the Department.

The Department will perform Quality Assurance (QA) testing on (at least) 20% of the test data submitted by the Contractor. QA testing is intended to verify the Contractor's QC test data. Upon receipt of the Contractor's test report for a section, the QA Inspector will randomly select (at least) 20% of the segments for evaluation and test in accordance with KM202 (with the exception of the evaluation period if greater than 60 days old) within 2 weeks of the QC testing. The Inspector will evaluate zones within the segments designated by the QC test report.

The Department will base payment on the Contractor's QC test results if:

- the QC results (for each segment evaluated) are passing and
- the QC and QA mean values differ by less than 10%.

If a dispute should arise regarding the acceptability of the Contractor's QC test results the dispute resolution shall be conducted as follows:

1. If the retroreflectivity values obtained during the QA testing indicate failure within the segment or the mean values differ by more than 10 %; the Contractor and the QA Inspector will compare the readings taken with the two instruments. Additional readings will be taken within that segment, if necessary.
2. If the variance between QC and QA testing does not indicate a change in the pay quantities for the segment (i.e. QC and QA readings are both passing but there is more than a 10% difference between the mean values) no additional readings will be necessary. However, an effort should be made as soon as possible, when a discrepancy between mean values is greater than 10%, to determine what has caused the discrepancy and how it can be resolved.
3. If the variance between QC and QA testing does indicate a change in the pay quantities for the section (i.e. QC readings are bonus and QA readings are only passing and there is more than a 10% difference between the mean values) additional readings will be necessary. To obtain additional readings, the QC and the QA will establish new zones, within the segments in question, to represent the section of striping. The QC and QA inspectors will perform the required evaluations on these zones together.
4. If the mean of the readings taken during the evaluation (detailed in Section 3) do not agree (within the allowed 10% variance) and there is a dispute regarding the pay factor; or if resolution to the variance cannot be reached by the QC and QA

Inspectors; additional testing along with the QC and QA inspectors, will be performed by the Central Office Division of Traffic and/or Division of Materials to resolve the dispute. The readings obtained by the Central Office representatives will be taken in accordance with KM202 (with the exception of the evaluation period if greater than 60 days old). The readings will be obtained within two weeks of a written request from the District Quality Assurance Inspector and the Contractors' Quality Control Inspector for all sections in dispute. The readings taken by Central Office personnel will be used to determine whether the original QC or QA readings will be considered final for the sections in dispute and payment will be based on those original readings.

The Department reserves the right to take over the QC portion of testing. In the event that the Department exercises this option, the Contractor will incur the cost of testing performed by the Department.

The Department will furnish the Contractor with a blank copy of the Contractors Daily Striping Report (DSR). The Contractor shall complete and furnish this DSR to the Resident Engineer's office daily for each crew for each color. The information on the DSR shall reflect the milepoints and quantities for striping completed for that day for that crew. The Contractor shall also include with the DSR the paint certification for paint used on that day's striping.

MATERIALS

Select Materials for this project to meet the performance requirements detailed in this contract document. Initial samples must be submitted for approval prior to initiation of the striping operation. The initial sample may be sent from the manufacturer of the paint. The following compositional requirements will be evaluated on samples randomly obtained by Department representatives during each week that striping operations are in progress:

PAINTS

YELLOW

WHITE

- | | | | |
|-----|-----------------------|---------------------|----------------------------|
| (1) | COLOR: | Fed Std. 595B-38907 | Fed. Std. 595B-37925 |
| (2) | LEAD: | < 5ppm | <5ppm |
| (3) | TiO ₂ : | NA | 10% by wt. of pigment min. |
| (4) | VOC: | 150-g/liter max. | 150-g/liter max. |
| (5) | CONTRAST RATIO (MIN): | 0.97 | 0.99 |

Test Methods to be used in the determination of these properties:

- (1) Allowable variation of the color, measured in the laboratory, will be $2.0 \Delta E_{cmc}$ from the referenced standard color. These values shall be obtained from a spectrophotometer utilizing a D65 illuminant at 45° illumination and 0° viewing with a 2° observer. Readings will be taken only over the black portion of the Leneta sheet on a 15 mil (wft) draw down.
- (2) ASTM D 3335 "Low Concentrations of Lead, Cadmium and Cobalt in Paint by Atomic Absorption Spectroscopy"
- (3) ASTM D 4764 "Determination by X-Ray Fluorescence of Titanium Dioxide Content in Paint"
- (4) ASTM D 2369 "Test Method for Volatile Content of Coatings"
And
ASTM D 4017 "Test Method for Water in Paints and Paint Materials by Karl Fischer Method"
- (5) ASTM D 2805 "Hiding Power of Paints by Reflectometry" with the following exceptions the contrast ratio will be determined on a 15 mil (wft) draw down (on a Leneta form 2c), allowed to dry for 16 to 24 hours at $73 \pm 2^\circ$ F, and 50% relative humidity.

If randomly obtained samples do not meet the compositional criteria, the following deductions will be assessed to the striping bid items for the routes where the failing paint was used:

COLOR: 10% each day used

LEAD: 60% each day used

TiO₂: 10% each day used
VOC: 60% each day used
CONTRAST RATIO: 10% each day used

If the contractor cannot produce documentation detailing the number of days the failing material was used on this project, the deduction will be based on the quantity of striping that the failing batch of paint represents. The percentage deduction for use of materials which do not meet the compositional criteria will be cumulative, but will not exceed 60% of the payment for the striping bid items for the routes where the failing paint was used.

If two random samples fail to meet minimum compositional requirements, striping operations will be discontinued. Before the Contractor is allowed to resume striping, the Department will randomly sample and test each lot of paint the contractor has in stock at the storage location.

For lots of paint that fail to meet the minimum compositional criteria, the stock material will be rejected. The contractor will be required to remove all failing paint from his central storage location. Lots that are tested and found to be in compliance with the compositional requirements may be used.

BEADS: Beads will only be evaluated as part of the system (through retroreflectivity readings). Testing of the coatings, gradation and initial quality of the product applied shall be the responsibility of the contractor.

EQUIPMENT

The Contractor's striper shall be equipped with electrical foot counters. The counters shall individually tabulate the amount of footage applied by each striping gun on the carriage, whether solid or dashed. The counters shall be capable of measuring up to six digits and shall have a reset feature. The counters shall be calibrated in the presence of the Engineer to insure an accurate measurement of the paint applied.

The Contractor's striper shall be equipped with an accurate dashing mechanism, capable of being adjusted to retrace existing lane line or centerline markings as directed by the Engineer. The striper shall also be equipped with a detection device that will automatically cutoff the paint guns when a raised pavement marker is detected in the pavement. The Contractor, at their own expense, shall replace or adequately clean any pavement marker lens that is painted.

The Contractor's **striper shall be equipped** with a **Data Logger System**. The Data Logger shall read the volume of paint consumed in line. Flow may be measured by

counting strokes of high pressure airless pumps, or by counting strokes of low pressure pumps. From the footage data and flow data, the data logger shall calculate, in real time, the gallons per mile of each color of paint. It shall also calculate the average wet film thickness for each color. Up to four stroke counters can be used, two for each color. The Data Logger shall read and display the ambient temperature and also the paint temperature of each of the two colors of paint. The data shall be recorded at the beginning of each job and at a minimum of 1 mile increments and the accumulated daily usage and shall be stored for later printing. The Data Logger shall be capable of storing and supplying the necessary scaling and calibration parameters to the flow meters, and shall provide a means of adjusting the calibration factor as necessary. The Data Logger shall include a remote cab mounted display, which shall indicate gallons per mile of actual application and of film thickness. In addition the Contractor's striper shall also be equipped with a calibrated measuring device for measuring material in the striper tanks.

The Contractor shall provide a separate sweeping unit powerful enough to remove normal highway dirt and debris. This unit shall not be a part of the striping truck. All surfaces shall be swept prior to painting and far enough in advance of the striper so as not to cause dust to mix with the paint. Where, in the opinion of the Engineer, abnormal amounts of material have accumulated beyond the capability of the required sweeping unit which will require shoveling or other means to remove, the Engineer will make arrangements, prior to painting, to have the material removed by the Department or that section of roadway will be deleted from the contract.

If quality problems persist, the Engineer may require the Contractor to provide detailed operating instructions from the manufacturer of the striping equipment. The Contractor shall then be required to operate the striping equipment within the suggested operating guidelines of the manufacturer, with particular emphasis on the speed of the striping operation, or make other adjustments until the quality of the striping is satisfactory to the Engineer.

APPLICATION OF STRIPING

All pavement markings shall be installed in accordance with Part III of the MUTCD and these specifications. Roadways shall be marked with 4", 6", 8" and 12" lines as indicated in the plans. The four-inch line shall not be less than four inches nor more than five inches in width. The six-inch line shall not be less than six inches nor more than seven inches in width. All of the Interstate and Parkway system shall be marked with six-inch lines. Gore area markings shall be installed at twice the width of the normal line width on that portion of roadway. All lines shall have distinct, clean edges with proper bead distribution across the entire width and length of the line.

Passing zones and lane lines shall be installed as a 10' segment of paint with a 30' gap. The length of the 10' segment shall not be less than 10' nor longer than 10 feet 6 inches. The stripe-gap cycle shall not be less than 39 feet 6 inches nor longer than 40 feet 6 inches.

Paint shall be applied at a minimum rate of 16.5 gallons per mile of solid four-inch line and 24.8 gallons per mile of solid six-inch line to produce a minimum thickness of 15 mils. Glass beads shall be applied at a minimum rate of six pounds per gallon of paint.

If the Engineer determines that the quality of the striping applied by the Contractor is unsatisfactory with regard to retroreflectivity, bead distribution, paint thickness, overspray, accuracy of retracing, line width, consistency, tracking, etc., he may stop the striping operation immediately until the Contractor can demonstrate that the problem has been corrected. Substantial quantities of poor quality striping, as determined by the Engineer, shall be considered a "striping error" and shall be handled as below.

Any striping error that requires removal of a line applied by the Contractor shall be removed, at the Contractor's expense, by a removal method approved by the Engineer. This removal process shall be done in a manner that shall not be detrimental to the pavement. Painting over the line with bituminous or other materials to obliterate the markings will not be allowed. Upon notification of a striping error by the Engineer, the Contractor shall be required to begin the process of correcting the striping error within five working days and shall work continuously to complete the corrective work prior to striping any other section of roadway included in this contract. Liquidated damages, as outlined in the Standard Specifications, shall apply for each day beyond the five working days that the Contractor has not begun to correct the striping error or continuously worked to complete the corrective work.

The Contractor shall be responsible for the appropriate disposal of all paint containers, waste products, etc. The Contractor shall also be responsible for all necessary cleanup of any paint or other material that is spilled onto the pavement or elsewhere as a result of his operations.

The Contractor shall be responsible for protecting the line from traffic until dry to eliminate tracking. For the purposes of measuring retroreflectivity, the occasional incidence of tracking will be handled in accordance with KM 202. However, retroreflectivity readings will be taken on sections with substantial amounts of tracking and the readings will be used in the calculation of payment. If the contractor elects to use additional trail vehicles beyond what is specified in the TRAFFIC CONTROL PLAN, the additional cost shall be incidental to the bid item "Maintain and Control Traffic. "

PAINT ON VEHICLES

The Contractor shall be responsible for addressing disputes with the public regarding paint on vehicles that occur as a result of his operations. All complaints from the public shall be addressed in a timely manner and the Contractor must demonstrate a "good faith" attempt to resolve disputes to the satisfaction of the citizen. However, the Contractor shall have the right to dispute fault and refuse settlement in cases where the Contractor feels that paint on the vehicle was a result of negligence on the part of the citizen. Unresolved disputes involving paint on vehicles shall be handled through the

legal system. The Department shall not be held responsible for paint on vehicles under any circumstances.

RETROREFLECTIVITY REQUIREMENTS

Although the paint used on this project will be tested by the Department for various compositional requirements and minimum acceptable application rates for paint and beads are specified elsewhere in this proposal, it shall be the responsibility of the Contractor to insure that all striping meets the retroreflectivity requirements specified in this contract.

Retroreflectivity readings will be taken only by qualified employees of the Department and Contractor who hold qualification from the Department as Pavement Marking Inspection Technicians or by a Department approved vendor. Portable readings will be taken in accordance with KM202.

The Department may choose to obtain retroreflectivity readings using a mobile retroreflectometer. Mobile retroreflectometer readings will be taken using a 30M-geometry instrument by a Department approved vendor in accordance with KM203.

The minimum retroreflectivity values are as follows:

Minimum Retroreflectivity Values		
Color	Yellow –mcd/m ² /lux	White – mcd/m ² /lux
LTL 2000	175	250
Mobile (30M-geometry)	150	225

The retroreflectivity values listed in this contract have been established taking into account the variances of the retroreflectivity measuring instruments. Therefore, no adjustments for variances will be made when using the measured retroreflectivity readings to determine acceptance or incentive payment.

Restriping will be required for striping that fails to meet the minimum retroreflectivity requirements. The provisions for restriping are described in the section of this contract entitled MEASUREMENT AND PAYMENT. Complete restriping within 30 calendar days after notification by the Engineer except that no striping will be performed after **October 15, 2003**. All aspects of this specification shall apply to lines that are repainted due to failure to meet the requirements of this specification including the retroreflectivity requirements.

Liquidated damages, as outlined in the Standard Specifications, shall be assessed for each day beyond the 30 calendar days that repainting is not completed and shall accrue until the **October 15, 2003** deadline. At that point, no additional striping will be performed and payment will be based upon the Payment Schedule.

SCHEDULING AND PRIORITY PAINTING

The contractor shall begin painting no later than **April 1, 2003**. At the Pre-construction conference, the Engineer may provide the contractor with a list of priority routes (not to exceed 10 percent of the total project estimate) which are to be painted prior to **May 1, 2003**. The painting of all scheduled routes shall be completed by **September 1, 2003**. The Contractor shall be assessed liquidated damages as outlined in Section 108.09 of the Standard Specifications for each calendar day that any of the scheduled routes are not painted with all lines.

The Contractor shall coordinate the daily striping schedule, in advance, with the Engineer. Once priority routes (if any) are finished, work must be completed in a county, per color, prior to advancing elsewhere except when approved in writing by the Engineer. The Engineer may require the Contractor to prepare a written striping schedule for the entire project, taking into account the priority routes. If required, this schedule shall be presented to the Engineer prior to the commencement of work and shall be updated each week. If a written schedule is not required initially, the Engineer reserves the right to require that a written schedule be provided at any point during the execution of this contract. Also, the Contractor shall be accessible to the Engineer for the purposes of monitoring the Contractor's quality control, traffic control, and obtaining paint samples.

The Engineer may eliminate any route from the schedule if it is determined that the route does not require painting. Also, the Engineer may add additional routes deemed necessary to be painted.

MEASUREMENT AND PAYMENT

The Contractor will be paid for the actual linear miles (rounded to the nearest hundredth) of four-inch and six-inch solid line for each color applied, as determined by the Engineer. Payment for lines other than four-inch and six-inch in width shall be as follows:

8" LINES _____ 2.0 x RATE FOR 4" LINES

12" LINES _____ 2.0 x RATE FOR 6" LINES

Full payment to the Contractor for the bid item 4" and 6" PAVE STRIPING WB (COLOR) will be based upon successful compliance with the retroreflectivity requirements outlined in this proposal. The Contractor will be paid 60% of the payment for the bid item after application of striping to a particular section of roadway. The remaining payment will be made based upon the following procedure and the Payment Schedule:

The work completed in one day by one striping crew for each color will be considered a section. Each section will be divided into segments (according to KM 202 or KM 203)

for the purpose of evaluating retroreflectivity.

1. If 80% or more of the readings taken within a segment are above the specified minimum retroreflectivity for each color, the segment will be considered as passing.
2. If a section is not accepted and less than 60% of the readings are above the specified minimum the contractor will be required to restripe. The restriping will be subject to the same requirements as the original striping.
3. If a section is not accepted and the number of passing readings is $\geq 60\%$ and $< 80\%$, the Contractor will be asked to restripe failing segments. The Contractor has the following options:
 - Restripe segment at no additional cost to the Department; or
 - If time does not allow for the segments to be restriped, accept deduction in payment for striping that has been determined below standard with the understanding that the Contractor may forfeit the incentive monies.

Payment Schedule

	Initial Payment	Final Payment	Total Payment
Passing	60%	40%	100%
Below Standard w/ deduction	60%	20%	80%
Failing	60%	0%	60%

Payment will not be made nor will retroreflectivity tests be conducted for lines that do not meet the minimum application rates for paint and beads. The contractor shall restripe these lines at his expense.

A deduction in payment will be made for using paint that fails to meet the required material composition requirements as outlined in the MATERIALS section of this specification.

INCENTIVE PAYMENT

The Contractor will be eligible for incentive payment based on the retroreflectivity for each color for the entire contract and the following requirements:

- all striping on the routes listed in the bid proposal, including any adjustments provided at the Pre-construction conference, is completed prior to the completion date of **September 1, 2003**;
- at least 95% of the total line miles striped under this contract shall be considered passing as defined in the measurement and payment section of this contract; and
- exceptional retroreflectivity has been achieved as defined in the table below.

Exceptional Retroreflectivity		
Yellow	LTL 2000	> 225
	Mobile	> 200
White	LTL 2000	> 300
	Mobile	> 275

The Department will calculate the incentive payment by multiplying the payment for the total line miles striped for each color by the appropriate Pay Value listed in the "Exceptional Retroreflectivity Adjustment Schedule" below:

Exceptional Retroreflectivity Adjustment Schedule

<u>Percent of Readings in Exceptional Category</u>	<u>Pay Value</u>
25 – 29	+0.05
30 – 34	+0.06
35 – 39	+0.07
40 – 44	+0.08
45 – 49	+0.09
≥ 50	+0.10

Incentive pay for each color will be calculated separately depending on the method by which the retroreflectivity readings were obtained (LTL 2000 or mobile readings). The retroreflectivity readings taken on lines that are restriped will replace the readings obtained on the initial striping for the purposes of calculating the incentive.

TRAFFIC CONTROL PLAN

Waterborne Paint Striping

1. Traffic shall be maintained in accordance with the MUTCD, the Standard Specifications for Road and Bridge Construction, and the Standard Drawings, current editions.

2. Contrary to Section 112 of the Standard Specifications, all items necessary to maintain and control traffic shall be included in the bid item "Maintain and Control Traffic."
3. Any temporary traffic control items, devices, materials, and incidentals shall remain the property of the Contractor, unless otherwise addressed, when no longer needed.
4. The Engineer shall approve all signing before the Contractor can start work.
5. If the Contractor desires to deviate from the traffic control scheme outlined in the standard drawings, he shall prepare an alternate plan and present it in writing to the Engineer. This alternate plan can be used only after review and approval of the District and the Divisions of Traffic and Construction.
6. The Contractor's vehicles shall always move with and not across or against the flow of traffic. These vehicles will not be permitted to make U-turns at any location. The striper will not be permitted to stop and back down the road or ramps to stripe gore lines and turn lanes. Vehicles shall enter or leave work areas in a manner that will not be hazardous to, or interfere with, normal traffic flow. Vehicles shall not park or stop except within designated work areas. Personal vehicles will not be permitted to park within the right-of-way except in specific areas designated by the Engineer.
7. The paint supply truck shall not be allowed to operate as one of the traffic control vehicles shown on the attached traffic control drawings. If one of the required traffic control vehicles experiences mechanical problems or for some other reason is not available to remain in position as shown in the traffic control scheme, the striping operation shall cease until all required vehicles are in place.
8. Striping on interstates and other selected routes will only be permitted between the hours of 9:00 PM and 6:00 AM. Striping may not be permitted on other roadways during peak times of the day (those peak times are 6:00 AM - 9:00 AM and 3:00 PM - 6:00 PM in Jefferson County), holiday periods, or special events as determined by the Engineer. Striping on roads in Jefferson County will only be permitted between the hours of 9:00 PM and 6:00 AM.
9. On two-lane, two-way highways, the Contractor shall make provisions to the satisfaction of the Engineer to periodically allow traffic to safely pass the train of vehicles in the striping operation.
10. In low speed, urban situations, the intermediate trail vehicle, shown between the striper and the final trail vehicle on the attached traffic control drawings, may be deleted at the discretion of the engineer.

EXTENSION OF CONTRACT

- This contract may be extended for additional one year periods provided both the Department and the Contractor agree to exercise this option. The contract may be extended in one year increments for a total of two additional years after completion of the initial contract. The Department will initiate the offer to extend the contract after the completion of all striping and a review of the Contractor's performance from the prior year.

If extended, the following new provisions will be included in the extended contract:

- Unit bid prices will remain the same for each year this contract is extended.
- The datalogger reporting will be used as a quality control measure to ensure consistent application of striping
- Quantities to be striped in the extended year may be reduced as a result of the durability of the previous striping year.

CONTRACT EXPIRATION

This contract will expire on **December 31 of the calendar year of the contract**, unless an extension of contract has been approved and processed for an additional one-year period.

PART II

SPECIAL PROVISIONS APPLICABLE TO PROJECT

SPECIAL PROVISION NO.

TITLE

13 Crash Cushions (4-5-2000)

*

*These Special Provisions are included in the Supplemental Specifications.

PART III

EMPLOYMENT, WAGE AND RECORD REQUIREMENTS
(Copies of each Attached)

1. Schedule of Minimum Wages Established for the Project.
2. Labor and Wage Requirements, applicable to other than Federal-Aid System Contracts. (Rev. 2-16-95)

Apprentices or trainees shall be permitted to work as such subject to Administrative Regulations adopted by the Commissioner of Workplace Standards. Copies of these regulations will be furnished upon request from any interested person.

Before using apprentices on the job the contractor shall present to the Contracting Officer written evidence of registration of such employees in a program of a State apprenticeship and training agency approved and recognized by the U. S. Bureau of Apprenticeship and Training. In the absence of such a State agency, the contractor shall submit evidence of approval and registration by the U. S. Bureau of Apprenticeship and Training.

The contractor shall submit to the Contracting Officer, written evidence of the established apprenticeship-journeyman ratios and wage rates in the project area, which will be the basis for establishing such ratios and rates for the project under the applicable contract provisions.

TO: EMPLOYERS/EMPLOYEES

PREVAILING WAGE SCHEDULE:

The wages indicated on this wage schedule are the least permitted to be paid for the occupations indicated. When an employee works in more than one classification, the employer must record the number of hours worked in each classification at the prescribed hourly base rate.

OVERTIME:

Overtime is to be paid after an employee works eight (8) hours a day or forty (40) hours a week, whichever gives the employee the greater wages. At least time and one-half the base rate is required for all overtime. A laborer, workman or mechanic and an employer may enter into a written agreement or a collective bargaining agreement to work more than eight (8) hours a calendar day but not more than ten (10) hours a calendar day for the straight time hourly rate. Wage violations or questions should be directed to the designated Engineer or the undersigned.

LABOR AND WAGE REQUIREMENTS
APPLICABLE TO OTHER THAN FEDERAL-AID SYSTEM PROJECTS

- I. Application
- II. Nondiscrimination of Employees (KRS 344)
- III. Payment of Predetermined Minimum Wages
- IV. Statements and Payrolls

I. APPLICATION

1. These contract provisions shall apply to all work performed on the contract by the contractor with his own organization and with the assistance of workmen under his immediate superintendence and to all work performed on the contract by piecework, station work or by subcontract. The contractor's organization shall be construed to include only workmen employed and paid directly by the contractor and equipment owned or rented by him, with or without operators.

2. The contractor shall insert in each of his subcontracts all of the stipulations contained in these Required Provisions and such other stipulations as may be required.

3. A breach of any of the stipulations contained in these Required Provisions may be grounds for termination of the contract.

II. NONDISCRIMINATION OF EMPLOYEES

AN ACT OF THE KENTUCKY
GENERAL ASSEMBLY TO PREVENT
DISCRIMINATION IN EMPLOYMENT
KRS CHAPTER 344
EFFECTIVE JUNE 16, 1972

The contract on this project, in accordance with KRS Chapter 344, provides that during the performance of this contract, the contractor agrees as follows:

1. The contractor shall not fail or refuse to hire, or shall not discharge any individual, or otherwise discriminate against an individual with respect to his compensation, terms, conditions, or privileges of employment, because of such individual's race, color, religion, national origin, sex, disability or age (between forty and seventy); or limit, segregate, or classify his employees in any way which would deprive or tend to deprive an individual of employment opportunities or otherwise adversely affect his status as an employee, because of such individual's race, color, religion, national origin, sex, disability or age (between forty and seventy). The contractor agrees to post in conspicuous places, available to employees and applicants for employment, notices to be provided setting forth the provisions of this nondiscrimination clause.

2. The contractor shall not print or publish or cause to be printed or published a notice or advertisement relating to employment by such an employer or membership in or any classification or referral for employment by the employment agency, indicating any preference, limitation, specification, or discrimination, based on race, color, religion, national origin, sex, disability or age (between forty and seventy), except that such notice or advertisement may indicate a preference, limitation, or specification based on religion, or national origin when religion, or national origin is a bona fide occupational qualification for employment.

3. If the contractor is in control of apprenticeship or other training or retraining, including on-the-job training programs, he shall not discriminate against an individual because of his race, color, religion, national origin, sex, disability or age (between forty and seventy), in admission to, or employment in

any program established to provide apprenticeship or other training.

4. The contractor will send to each labor union or representative of workers with which he has a collective bargaining agreement or other contract or understanding, a notice to be provided advising the said labor union or workers' representative of the contractor's commitments under this section, and shall post copies of the notice in conspicuous places available to employees and applicants for employment.

The contractor will take such action with respect to any subcontract or purchase order as the administering agency may direct as a means of enforcing such provisions, including sanctions for non-compliance.

III. PAYMENT OF PREDETERMINED
MINIMUM WAGES

1. These special provisions are supplemented elsewhere in the contract by special provisions which set forth certain predetermined minimum wage rates. The contractor shall pay not less than those rates.

2. The minimum wage determination schedule shall be posted by the contractor, in a manner prescribed by the Department of Highways, at the site of the work in prominent places where it can be easily seen by the workers.

IV. STATEMENTS AND PAYROLLS

1. All contractors and subcontractors affected by the terms of KRS 337.505 to 337.550 shall keep full and accurate payroll records covering all disbursements of wages to their employees to whom they are required to pay not less than the prevailing rate of wages. Payrolls and basic records relating thereto will be maintained during the course of the work and preserved for a period of one (1) year from the date of completion of this contract.

2. The payroll records shall contain the name, address and social security number of each employee, his correct classification, rate of pay, daily and weekly number of hours worked, itemized deductions made and actual wages paid.

3. The contractor shall make his daily records available at the project site for inspection by the State Department of Highways contracting office or his authorized representative.

Periodic investigations shall be conducted as required to assure compliance with the labor provisions of the contract. Interrogation of employees and officials of the contractor shall be permitted during working hours.

Aggrieved workers, Highway Managers, Assistant District Engineers, Resident Engineers and Project Engineers shall report all complaints and violations to the Division of Contract Procurement.

The contractor shall be notified in writing of apparent violations. The contractor may correct the reported violations and notify the Department of Highways of the action taken or may request an informal hearing. The request for hearing shall be in writing within ten (10) days after receipt of the notice of the reported violation. The contractor may submit records and information which will aid in determining the true facts relating to the reported violations.

Any person or organization aggrieved by the action taken or the findings established as a result of an informal hearing by the Division of Contract Procurement may request a formal hearing.

4. The wages of labor shall be paid in legal tender of the United States, except that this condition will be considered satisfied if payment is made by a negotiable check, on a solvent bank, which may be cashed readily by the employee in the local community for the full amount, without discount or collection charges of any kind. Where checks are used for payments, the contractor shall make all necessary arrangements for them to be cashed and shall give information regarding such arrangements.

5. No fee of any kind shall be asked or accepted by the contractor or any of his agents from any person as a condition of employment on the project.

6. No laborers shall be charged for any tools used in performing their respective duties except for reasonably avoidable loss or damage thereto.

7. Every employee on the work covered by this contract shall be permitted to lodge, board, and trade where and with whom he elects and neither the contractor nor his agents, nor his employees shall directly or indirectly require as a condition of employment that an employee shall lodge, board or trade at a particular place or with a particular person.

8. Every employee on the project covered by this contract shall be an employee of either the prime contractor or an approved subcontractor.

9. No charge shall be made for any transportation furnished by the contractor or his agents to any person employed on the work.

10. No individual shall be employed as a laborer or mechanic on this contract except on a wage basis, but this shall not be construed to prohibit the rental of teams, trucks or other equipment from individuals.

No Covered employee may be employed on the work except in accordance with the classification set forth in the schedule mentioned above; provided, however, that in the event additional classifications are required, application shall be made by the contractor to the Department of Highways and (1) the Department shall request appropriate classifications and rates from the proper agency, or (2) if there is urgent need for additional classification to avoid undue delay in the work, the contractor may employ such workmen at rates deemed comparable to rates established for similar classifications provided he has made written application through the Department of Highways, addressed to the proper agency, for the supplemental rates. The contractor shall retroactively adjust, upon receipt of the supplemental rates schedule, the wages of any employee paid less than the established rate and may adjust the wages of any employee overpaid.

11. No contractor or subcontractor contracting for any part of the contract work which may require or involve the employment of laborers or mechanics shall require or permit any laborer or mechanic in any work-week in which he is employed on such work, to work in excess of eight hours in any calendar day or in excess of forty hours in such work-week unless such laborer or mechanic receives compensation at a rate not less than one and one half times his basic rate of pay for all hours worked in excess of eight hours in any calendar day or in excess of forty hours in such work-week. A laborer, workman or mechanic and an employer may enter into a written agreement or a collective bargaining agreement to work more than eight (8) hours a calendar day but not more than ten (10) hours a calendar day for the straight time hourly rate. This agreement shall be in writing and shall be executed prior to the employee working in excess of eight (8) hours, but not more than ten (10) hours, in any one (1) calendar day.

12. Payments to the contractor may be suspended or withheld due to failure of the contractor to pay any laborer or mechanic employed or working on the site of the work, all or part of the wages required under the terms of the contract. The Department may suspend or withhold payments only after the contractor has been given written notice of the alleged violation and the contractor has failed to comply with the wage determination of the Department of Highways.

13. Contractors and subcontractors shall comply with the sections of Kentucky Revised Statutes, Chapter 337 relating to contracts for Public Works.

Revised 2-16-95

EXECUTIVE BRANCH CODE OF ETHICS

In the 1992 regular legislative session, the General Assembly passed and Governor Brereton Jones signed Senate Bill 63 (codified as KRS 11A), the Executive Branch Code of Ethics, which states, in part:

KRS 11A.040 (6) provides:

No present or former public servant shall, within six (6) months of following termination of his office or employment, accept employment, compensation or other economic benefit from any person or business that contracts or does business with the state in matters in which he was directly involved during his tenure. This provision shall not prohibit an individual from returning to the same business, firm, occupation, or profession in which he was involved prior to taking office or beginning his term of employment, provided that, for a period of six (6) months, he personally refrains from working on any matter in which he was directly involved in state government. This subsection shall not prohibit the performance of ministerial functions, including, but not limited to, filing tax returns, filing applications for permits or licenses, or filing incorporation papers.

KRS 11A.040 (8) states:

A former public servant shall not represent a person in a matter before a state agency in which the former public servant was directly involved, for a period of one (1) year after the latter of:

- a) The date of leaving office or termination of employment; or
- b) The date the term of office expires to which the public servant was elected.

This law is intended to promote public confidence in the integrity of state government and to declare as public policy the idea that state employees should view their work as a public trust and not as a way to obtain private benefits.

If you have worked for the executive branch of state government within the past six months, you may be subject to the law's prohibitions. The law's applicability may be different if you hold elected office or are contemplating representation of another before a state agency.

Also, if you are affiliated with a firm which does business with the state and which employs former state executive-branch employees, you should be aware that the law may apply to them.

In case of doubt, the law permits you to request an advisory opinion from the Executive Branch Ethics Commission, Room 136, Capitol Building, 700 Capitol Avenue, Frankfort, Kentucky 40601; telephone (502) 564-7954.

PART IV

INSURANCE

The Contractor shall carry the following insurance in addition to the insurance required by law:

- (1) Contractor's Public Liability Insurance not less than \$100,000.00 for damages arising out of bodily injuries to or death to one person. Not less than \$300,000.00 for damages arising out of bodily injuries to or death to two or more persons.
- (2) Contractor's Property Damages Liability Insurance. Not less than \$100,000.00 for all damages arising out of injury or destruction of property in any one accident. Not less than \$300,000.00 for all damages during the policy period.
- (3) Contractor's Protective Public Liability and Property Damage Insurance. The contractor shall furnish evidence with respect to operations performed for him by subcontractors that he carries in his own behalf for the above stipulated amounts.
- (4) The insurance required above must be evidenced by a Certificate of Insurance and this Certificate of Insurance must contain one of the following statements:
 - a. "policy contains no deductible clauses."
 - b. "policy contains a _____ deductible property
(amount)
damage clause but company will pay claim and collect
the deductible from the insured."
- (5) WORKMEN'S COMPENSATION INSURANCE. The contractor shall furnish evidence of coverage of all his employees or give evidence of self-insurance by submitting a copy of a certificate issued by the Workmen's Compensation Board.

PART V

STATEMENT OF INCOMPLETED WORK

1. Status of Active Prime Contracts.

Attached

1. STATUS OF ALL INCOMPLETED PRIME CONTRACTS

All active prime contracts must be reported. This includes prime contracts with public and private owners and joint-ventured contracts. The names of the joint venturers must be shown when reporting these projects. A machine or typed listing reporting the status of each contract is acceptable when attached to this report; however, the total amounts on the itemized listing must be reported in the space provided below:
